ORE 654 Applications in Ocean Acoustics

Course Project

Fall 2014

Bruce Howe

50% Project

18 September  title and brief abstract
9 October:    presentation of one paper on topic
6 November    current draft/status report
18 November   current draft/status report
25 November   written paper due; draft presentation
2 December    project presentations

Course Project
A topic of interest to the student and instructor will be chosen. The student will read several research articles about the topic, and apply the knowledge to analyze a new situation of interest. This will be written up in a paper (1500-2500 words, < 6 pages with figures in IEEE format) and a 15-minute presentation made to the class, with questions to follow.
