Seminar

Oahu Surf Climatology and Forecasting

by

Mr. Patrick Caldwell

NOAA Data Center Hawaii Liaison (NESDIS/NODC/NCDDC)
Dept. of Oceanography, University of Hawaii at Manoa

Abstract

A basic wave climatology will be given for the surf zones of the north and south shores of Oahu. This will lead into a discussion on elementary aspects of ocean wave properties and the basic steps for making a surf forecast highlighting the various products available on the internet. Finally, a case study will be shown.
